Leather

Fabric group:

D (Leder)

Colours:

- Black
- Natural
- Mint green

Fabric covering specifications:

A unique and naturally elegant leather type, developed on beautiful European quality skins. The refined natural warm look owes this leather to its specific vegetable-like finish and light vintage effect. Color nuances and differences in the skin, between the skins and between the batches are characteristic and inevitable for this type of leather. It has a semi-open grain structure and will change color and optics through use and through light over time. The natural characteristics such as scratches, insect bites, etc. are also clearly visible in this leather. Pure nature! Every square meter is unique! Difference in grip, grain and softness are proof of authenticity and help determine this special and distinctive leather.
